2. Reason for the Difference

The Bank decided to reverse part of its deferred tax assets, following careful consideration of its recoverability based on the business environment surrounding the Bank and the outlook for business performance. The Bank reversed 7,636 million yen in its deferred tax assets and recorded the amount as income taxes - deferred in the non-consolidated financial statements. This accounting procedure does not involve actual expenditure and has no impact on the Bank’s cash flows. The impact of this accounting treatment on the consolidated financial results is insignificant.
